

EUROPEAN JOURNAL OF NEURODEGENERATIVE DISEASES

Volume 2, No. 2/3 May-December 2013

CONTENTS

P. Calissano. Rita Levi-Montalcini: three crucial steps toward Stockholm.....	79
N. Ferrara. Discovery of VEGF, a key regulator of angiogenesis.....	81
F. Cesca, G. Schiavo, and F. Benfenati. Novel experimental models to study neurotrophin function.....	89
M.V. Chao. The next 50 years of NGF.....	101
A. Ciechanover. Intracellular Protein Degradation: From a vague idea through the lysosome and the ubiquitin-proteasome system and on to human diseases and drug targeting.....	113
R. Nisticò. Long-term potentiation in animal models of Alzheimer's disease.....	133
S. Lista, F. Garaci, N. Toschi and H. Hampel. Biochemical and imaging markers for the diagnosis of Alzheimer's Disease: an overview.....	143
G. Ginberg, H. Arien-Zakay, A. Nagler, U. Elchalal, P.I. Lelkes and P. Lazarovici. Human umbilical cord blood-derived mononuclear, hematopoietic and NGF-responsive stem cells confer neuroprotection in ischemic models.....	159
A. Cattaneo and F. Malerba. Taking pain out of NGF: painless NGF for Alzheimer's disease therapy.....	171
G. Nisticò, K. Broich and H. Hampel. Need for new guidelines for Alzheimer's disease clinical trials.....	181
C. Pardini, C. Viaggi, C. Gerace, G.U. Corsini and F. Vaglini. Esencephalic cell cultures from CYP2e1 knockout mice: A study on MPP+ toxicity.....	187
